Tool Share Rules

Members of the tool share borrow ladders, saws and the long-handled loppers for up to one week at a time. Each tool has a paper tag that names the last person who used it, so questions about blunt blades go to the right neighbour.

Return tools clean and dry to the green cupboard by the meeting room. If something breaks, say so in the tool share notebook; the repair circle fixes most things at its next session and nobody is charged for honest wear.
